EXECUTIVE SUMMARY

The Policy Development and Planning Bureau (PDPB) continuously monitors the status of implementation of Memorandum Circular (MC) No. 9, Series of 2019 or the “Guidelines for the Conduct of Research and Evaluation in the DSWD” otherwise known as the DSWD Research and Evaluation Policy. As part of the monitoring, a database of the Department’s research and evaluation studies (i.e. planned, on-going, and completed) is maintained by PDPB. A report on the studies undertaken by the DSWD-Offices, Bureaus, Services, and Units (OBSUs), including external researches, capturing all approved proposals and/or final reports should be submitted to PDPB on an annual basis in order to ensure that the database is maintained and updated.

At the same time, with the issuance of the MC No. 10, s.2019 or the “Protocol for the Conduct of Research Studies in DSWD Offices, Centers and Institutions, Amending AO No. 19, s. 2011 including Request of SWD Data/Information”, otherwise known as the DSWD Research Protocol, the DSWD Central Office (CO) and Field Offices (FOs) should adhere to the aforementioned guidelines in providing assistance to researchers in conducting research and evaluation (R&E) studies in DSWD Offices, Centers, and Institutions.

Internal R&E studies undertaken by DSWD include studies initiated by the CO and FOs, whether conducted in-house, joint, or fully outsourced. On the other hand, external R&E studies facilitated refer to those proposed by external researchers and assisted by the CO and FOs. Presented below are the highlights of the inventory of R&E studies that were undertaken and facilitated by the Department in CY 2020:

R&E Studies undertaken by DSWD CO

1. The number completed R&E studies undertaken by the DSWD Central Office-Offices, Bureaus, Services (CO-OBS) sharply declined from 20 in 2019 to 6 in 2020.
2. Among all the CO-OBS, the PDPB and 4Ps-NPMO reported the most number of R&E studies undertaken in 2020 at 40% each.
3. Most of the R&E studies undertaken by CO-OBS in 2020 were concentrated in the first two (2) Organizational Outcomes (OOs) of the Department, namely OO 1: *Well-being of poor families improved*, and OO 2: *Rights of the vulnerable sectors promoted and protected*.
4. The most common sector explored by the R&E studies undertaken by CO-OBS in 2020 was family and community at 40% of the total.
5. Majority of R&E studies conducted by CO-OBS in 2020 were descriptive in nature.
6. Four (4) R&E studies undertaken by CO-OBs in 2020 were fully outsourced.

R&E Studies undertaken by DSWD FOs

1. A total of nine (9) R&E studies were undertaken by Field Offices (FOs) in 2020.
2. As in the case of R&E studies managed by the CO-OBS, FO-initiated studies in 2020 were along OO1, OO2, and organization-focused objectives of the Department.
3. Family and community, organizational development, as well as children and youth were the sectors explored by FO-initiated studies.
4. Descriptive research was the most common type of R&E study conducted by FOs in 2020 at 78% of the total.
5. Most of the R&E studies undertaken by FOs in 2020 were in-house and majority of them are still ongoing.

External R&E Studies facilitated by CO and FOs

1. Over the past five (5) years, the general trend of the number of external R&E studies facilitated by DSWD is decreasing at an average rate of 10%.
2. Overall, the CO received the most number of external research requests in 2020 pegged at 27.
3. A total of 13 external researches were completed in 2020, 31% of which were facilitated by FO CAR.
4. Around three in four (77%) external research proponents assisted by CO and FOs in 2020 were students from higher education institutions.
5. As in the case of DSWD-initiated R&E studies, the most common sector investigated by external researchers in 2020 was family and community.
6. Nearly half (48%) of external researches facilitated by CO and FOs in 2020 were related to OO2: *Rights of the poor and vulnerable sectors promoted and protected*.

Key Recommendations

1. Explore on alternative modes of data collection if primary data collection is necessary. Use of available secondary datasets may also be looked into to attain research objectives without the need to collect primary data.
2. Strengthen the dissemination of DSWD administrative and secondary data. PDPB should maximize its Content Management Team to develop an interactive database that is easily accessible in the website.
3. Strengthen mechanisms for monitoring external researchers through an electronic research ticketing system with the assistance of ICTMS
4. Continue advocating and popularizing the research-related policies of the Department (i.e., MC 9 and 10, s.2019) as mentioned in the Memorandum of Reiteration issued by the Undersecretary for Policy and Plans
5. Review and harmonize the processes under the Research Protocol across the Central and Field Offices in consideration of pertinent laws (i.e., Data Privacy Act, Ease of Doing Business Law, Anti-Red Tape Act, etc.) and document its standard operating procedure towards ISO certification
6. Institutionalize research ethics in the Department through the establishment of a Research Ethics Committee, capacity building of its members, and operationalization of its Terms of Reference
7. Continue to implement the Online R&E Portal for both the CO and FOs to facilitate proper reporting and consolidation of undertaken and facilitated R&E studies
8. Strengthen the implementation and monitoring of the Client Satisfaction Measurement Survey to serve as the basis for evaluating the feedback of the researchers on the assistance provided
9. Ensure the strict and continuous implementation of MC Nos. 9 (DSWD Research and Evaluation Policy) and 10 (Amendment to the Protocol for the Conduct of Research Studies in DSWD Offices, Centers and Institutions), series of 2019
10. Strengthen linkages and networking with research institutions, the academe and other stakeholders to promote awareness on the DSWD R&E Policy and amended DSWD Protocol on the conduct of research in the Department
11. Continuously monitor the approved DSWD Research and Evaluation Agenda 2019-2022 (AO no. 22 s. 2019)

BACKGROUND

The DSWD MC No. 09, s. 2019 or the “Guidelines for the conduct of research and evaluation in the DSWD”, otherwise known as the *DSWD Research and Evaluation Policy*, was issued to:

1. Institutionalize the formulation and monitoring of the DSWD Research and Evaluation Agenda; and
2. Provide standards and criteria in the conduct of researches and evaluation studies in the Department.

The policy covers all DSWD Offices, Bureaus, Services, and Units (OBSUs) in the Central and Field Offices tasked to conduct research and evaluation studies on the DSWD policies, programs, and projects. This shall include the development, management, and implementation of any research and evaluation study initiated by the Department, regardless of execution (i.e., in-house, joint, or outsourced).

Additionally, the policy applies to external stakeholders who partner with the Department in the conduct of researches or evaluations related to or involving the DSWD, such as local and international research institutions, the academe, independent researchers, other national government agencies, local government units, and DSWD attached agencies.

With the growing interest on research studies in the Department, DSWD MC No. 10, s.2019 or the “Protocol for the Conduct of Research Studies in DSWD Offices, Centers and Institutions, Amending AO No. 19, s.2011 including Request of SWD Data/Information”, otherwise known as the *DSWD Research Protocol*, was also issued to:

1. Provide the standard protocols in conducting research studies in the Department and providing SWD data/statistics;
2. Define the role of the Central Office and Field Offices including external researchers in the processing of research request; and
3. Reduce the processing time for approval of research studies conducted by external researchers on DSWD Offices, Centers and Institutions.

This policy covers the following individuals/groups:

1. All DSWD Offices, Bureaus, Services, and Units in the Central and Field Offices, including Centers and Institutions tasked to provide data and assist external researchers in the conduct of research and studies.
2. External researchers such as students, academe, other government agencies including members of other branches of government, local and international organizations or research institutions, and other independent researchers who intend to conduct research studies related to or involving the Department.
3. Above-mentioned researchers seeking to acquire primary data from the Department including clients/beneficiaries currently at its Centers/Institutions, and on-going DSWD programs, projects, and services wherein their main subject of research study involves DSWD as an organization.
4. Academe, media, and general public who are not researchers but requesting current and secondary SWD data and statistics from the Department including clients/beneficiaries currently or served and programs, projects and services of the Department.

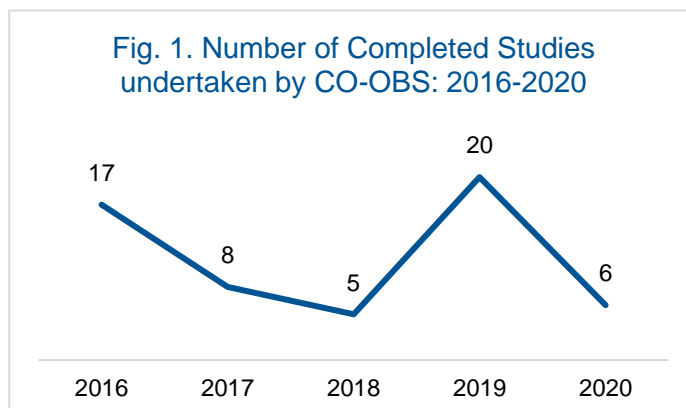

5. DSWD personnel conducting researches in DSWD Offices, Centers and Institutions, for the purpose of pursuing higher academic education.

With the issuances of the two (2) memorandum circulars, the PDPB is responsible to maintain an inventory of research and evaluation studies undertaken and managed by the DSWD, including external researches approved and facilitated by DSWD through the Central Office-OBSUs and Field Offices. This report presents a summary of the inventory for CY 2020, provides highlights of research and evaluation studies undertaken and facilitated, as well as recommendations to further promote the culture of research and evidence-based policy formulation in the Department.

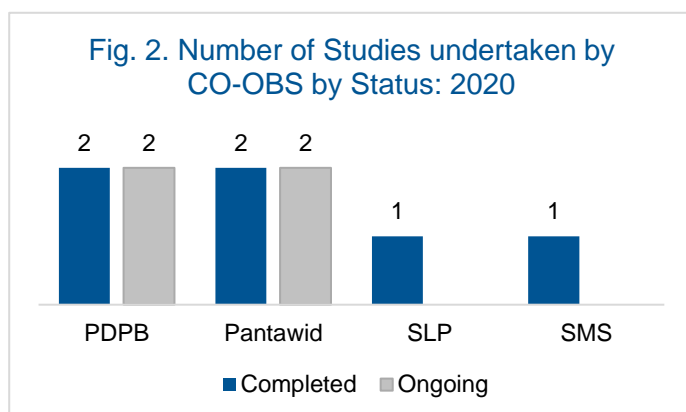

RESEARCH AND EVALUATION STUDIES UNDERTAKEN BY DSWD

CENTRAL OFFICE-INITIATED STUDIES

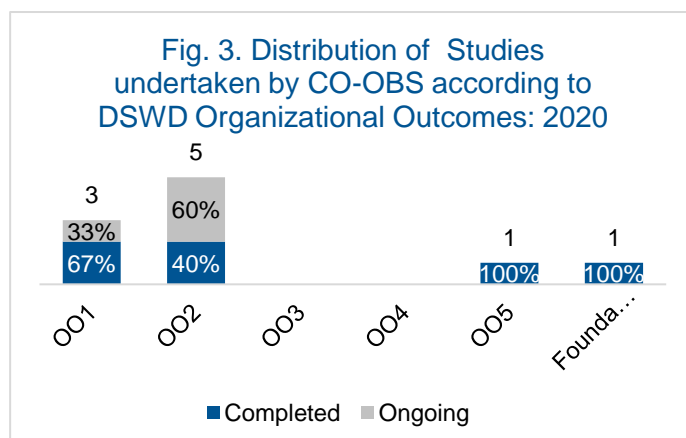

The number of completed research and evaluation (R&E) studies undertaken by the DSWD Central Office-Offices, Bureaus, Services (CO-OBS) sharply declined from 20 in 2019 to 6 in 2020. Only six (6) R&E studies were completed by CO-OBS in 2020 based on reports received. Aside from underreporting, the significant drop can be attributed to the limitations in the movement of personnel to conduct face-to-face interviews due to the minimum health standards and protocols implemented by the Government to mitigate the spread of the Coronavirus Disease (COVID-19). Some CO-OBS who were able to complete their studies opted to remote means of gathering information (e.g., phone interviews, online surveys). While other CO-OBS suspended their research activities due to travel restrictions in place.

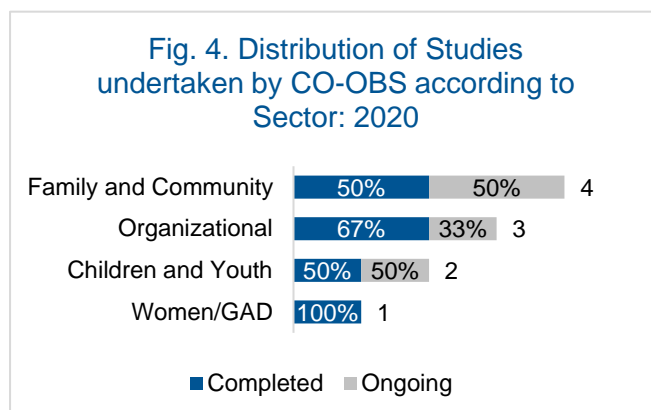

Among all the CO-OBS, the PDPB and 4Ps-NPMO reported the most number of R&E studies undertaken in 2020 at 40% each. Despite the operational challenges during the height of the pandemic, the Policy Development and Planning Bureau (PDPB) was able to undertake a total of four (4) R&E studies in 2020, half of which was completed within the year. The Pantawid Pamilyang Pilipino Program-National Program Management Office (4Ps-NPMO) also had two (2) completed and two (2) ongoing R&E studies in the same year. One of the completed studies managed by 4Ps-NPMO was finished prior to the pandemic.

Most of the R&E studies undertaken by CO-OBS in 2020 were concentrated in the first two (2) Organizational Outcomes (OOs) of the Department, namely OO 1: *Well-being of poor families improved*, and OO 2: *Rights of the vulnerable sectors promoted and protected*. Five (5) R&E studies were along OO 2, while three (3) studies were along OO 1. Another study was

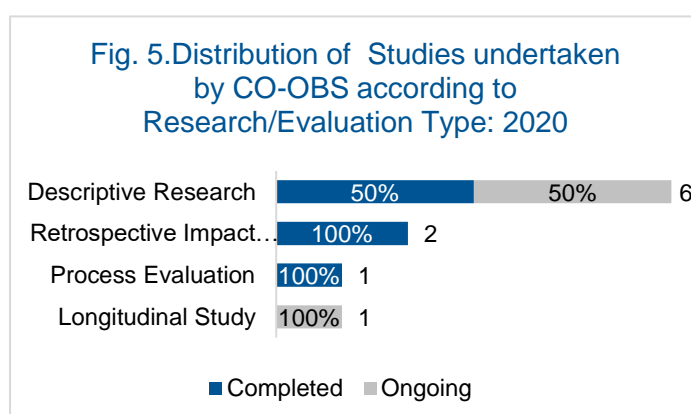

related to OO 5: *Delivery of social welfare and development programs by local government units (LGUs), through local social welfare and development offices (LSWDOs), improved.* And another one (1) was on the foundational outcomes of the Department.

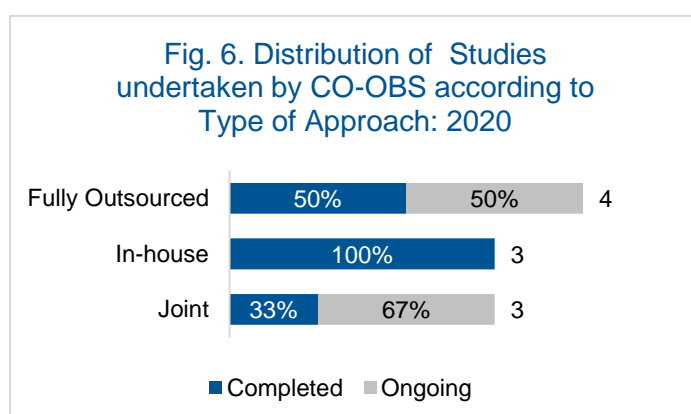

The most common sector explored by the R&E studies undertaken by CO-OBS in 2020 was family and community at 40% of the total. Four (4) of 10 studies embarked on by CO-OBS in 2020 covered the said sector. Half of which were already completed in the same year. Organizational development was the next most common sector studied upon by CO-OBS with two (2) completed and one (1) ongoing study. This was followed by the children and

youth sector with one (1) completed and one (1) ongoing study.

Majority of R&E studies conducted by CO-OBS in 2020 were descriptive in nature. With reference to the DSWD R&E Policy, descriptive research examines situations in order to provide insights on the current situation/place/people/events and establish the current norms, through scientific observation. Various CO-OBS managed six (6) descriptive researches in 2020. Half of which were completed in the same year.

Two (2) retrospective impact evaluation studies and one (1) process evaluation study were also completed. Whereas, one (1) longitudinal study has completed its first round, but the second round is still ongoing.

Four (4) R&E studies undertaken by CO-OBS in 2020 were fully outsourced. Half of which were completed in 2020. Fully outsourced studies refer to those implemented through the engagement with third-party researchers and evaluators. On the other hand, there were three (3) completed in-house studies and one (1) completed joint study. The 100% completion of in-house studies in 2020 could imply seamless internal

coordination within CO-OBS, as compared to fully outsourced and joint studies which involve engagement with external partner organizations.

FIELD OFFICE-INITIATED STUDIES

A total of nine (9) R&E studies were undertaken by Field Offices (FOs) in 2020.

Majority (6 out of 9) R&E studies initiated by FOs were completed in 2020. Seven (7) out of the nine (8) studies were from FO Caraga, while the other two (2) were from FO II. No reports on FO-initiated researches were received from the other regions.

As in the case of R&E studies managed by the CO-OBS, FO-initiated studies in 2020 were along OO1, OO2, and organization-focused objectives of the Department.

The studies about OO1 explored the big-ticketed programs of the Department: the Pantawid Pamilyang Pilipino Program (4Ps), the Sustainable Livelihood Program (SLP), and the Kapit-Bisig Laban sa Kahirapan – Comprehensive and Integrated Delivery of Social Services (KALAHI-CIDSS). The study on

OO2, on the other hand, looked at child labor and the readiness of clients of the Assistance to Individuals in Crisis Situation (AICS) to digital processing and payment schemes. Lastly, the completed study on OO3: *Immediate relief and early recovery of disaster victims/survivors ensured* investigated the resilience and adaptive capacity of households to disasters.

Family and community, organizational development, as well as children and youth were the sectors explored by FO-initiated studies.

Studies on family and community were about 4Ps, SLP, KALAHI-CIDSS, and AICS. While those about organizational development tackled human resource management, one of which was in light of the COVID-19 pandemic. The study on children and youth looked into child labor. No studies about other sectors catered by the Department (e.g., older persons, persons with disabilities, women/gender and development, etc.) were conducted based on the encoded information by the FOs.

Fig. 7. Distribution of Studies undertaken by FOs according to DSWD Organizational Outcomes: 2020

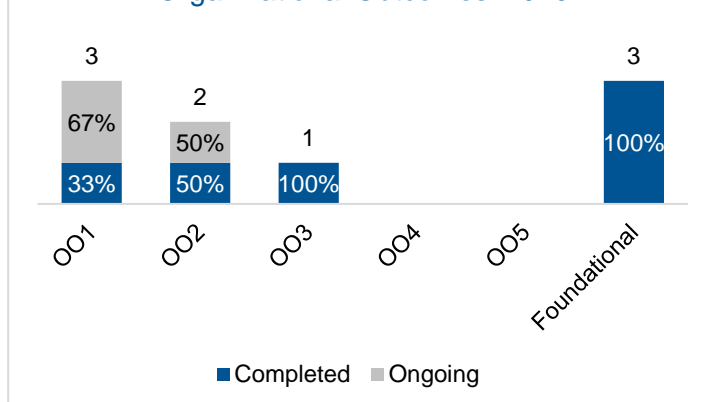

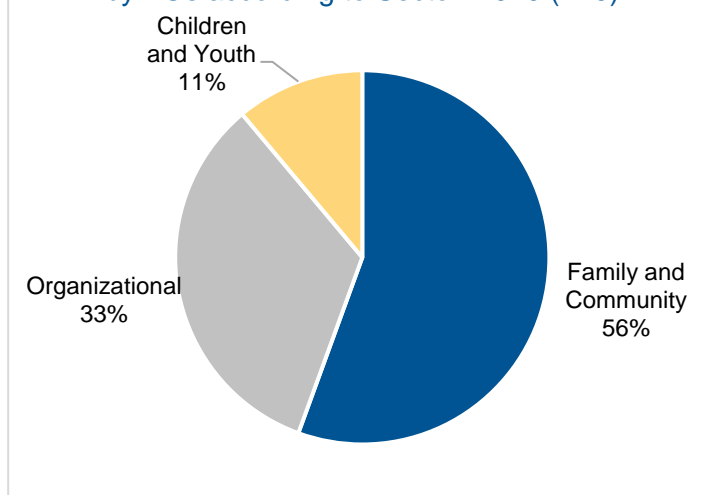

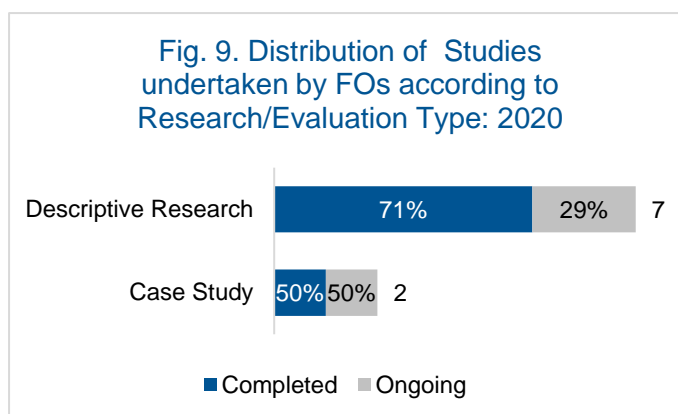

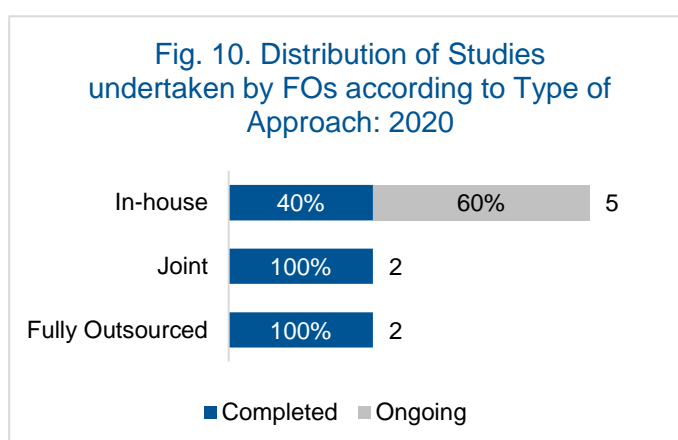

Fig. 8. Distribution of Studies undertaken by FOs according to Sector: 2020 (n=9)

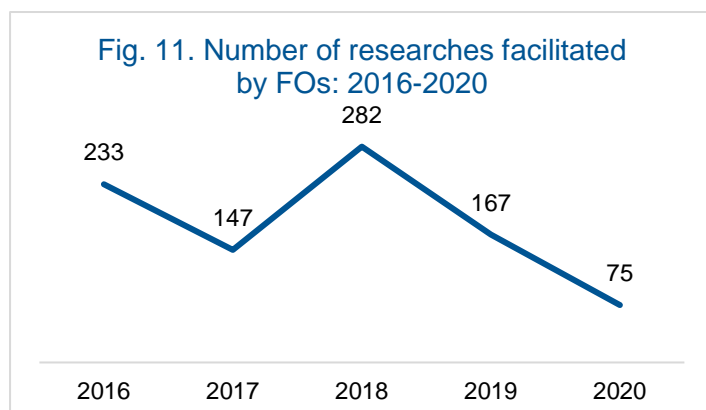

Descriptive research was the most common type of R&E study conducted by FOs in 2020 at 78% of the total. The FOs had five (5) completed and two (2) ongoing descriptive researches. The FOs also managed two (2) case studies, one of which was already completed in 2020. By definition, as described in the R&E Policy, case studies are in-depth investigation, which focuses on one or a few instances of a social phenomenon. FO Caraga studied the case of an SLP Association and selected KALAHI-CIDSS municipalities within the region.

Most of the R&E studies undertaken by FOs in 2020 were in-house and majority of them are still ongoing. Five (5) of nine (9) studies of FOs were in-house. Unlike the in-house studies of CO-OBS, which were all completed in 2020, three (3) of the FO in-house studies are still ongoing. This may imply the need to provide technical assistance and resource augmentation along R&E, and lack of workforce complement for FOs to efficiently implement R&E activities.

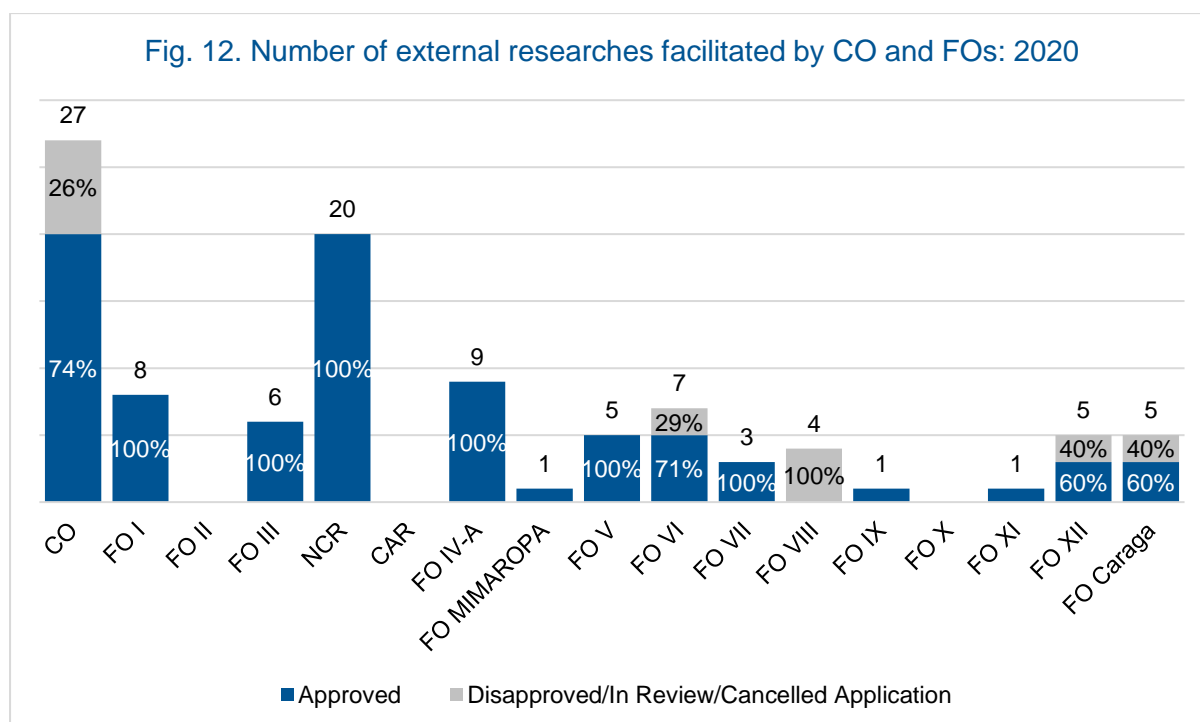

EXTERNAL RESEARCH AND EVALUATION STUDIES

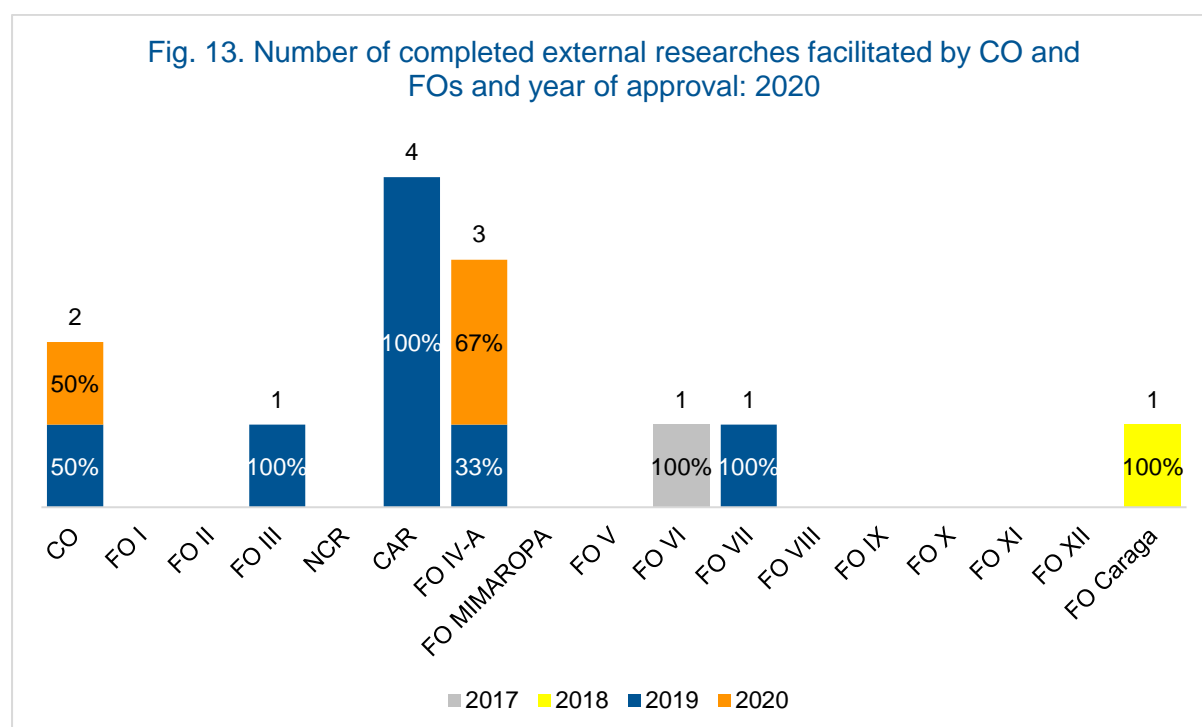

Over the past five (5) years, the general trend of the number of external R&E studies facilitated by DSWD is decreasing at an average rate of 10%. The number of external R&E studies facilitated was highest at 282 in 2018. But it continuously declined at an average rate of at least 40% in the past two (2) years. For 2020, 75 external R&E studies were facilitated by the FOs. The CO, on the other hand, facilitated 27

external researches. The observable decrease in 2019 can be attributed to underreporting. But the further decrease in 2020 may be closely linked to the COVID-19 pandemic, during which domestic travel, mass gathering, and face-to-face interaction was restricted. Less external researchers were able to visit the DSWD to request for approval of their research proposal. Nevertheless, external researchers resorted to sending research requests via email as part of the “new normal”.

Overall, the CO received the most number of external research requests in 2020 pegged at 27. Of the 27 external research requests at the CO, 20 research proposals (74%) were approved while the other 7 (26%) were either disapproved, still in review, or cancelled. FO NCR comes next with 20 external research requests facilitated, all of which were approved. Meanwhile, FOs II, CAR, and X reported no external research requests facilitated within the year.

A total of 13 external researches were completed in 2020, 31% of which were facilitated by FO CAR. Despite declaring no external research requests facilitated in 2020, FO CAR had four (4) external researches completed within the year. All of which were approved in 2019. FO VI, on the other hand, had one (1) completed research which was approved way back in 2017. Notably, majority of the completed researches in 2020 were approved in 2019, implying that the typical duration of a study is one (1) year.

Around three in four (77%) external research proponents assisted by CO and FOs in 2020 were students from higher education institutions. Out of the 102 external researchers facilitated, about half (52%) of them were from private higher education institutions, while a quarter (25%) were from state universities and colleges. Other research proponents were from corporate organizations/research institutions (13%), international universities (7%), and government agencies (3%).

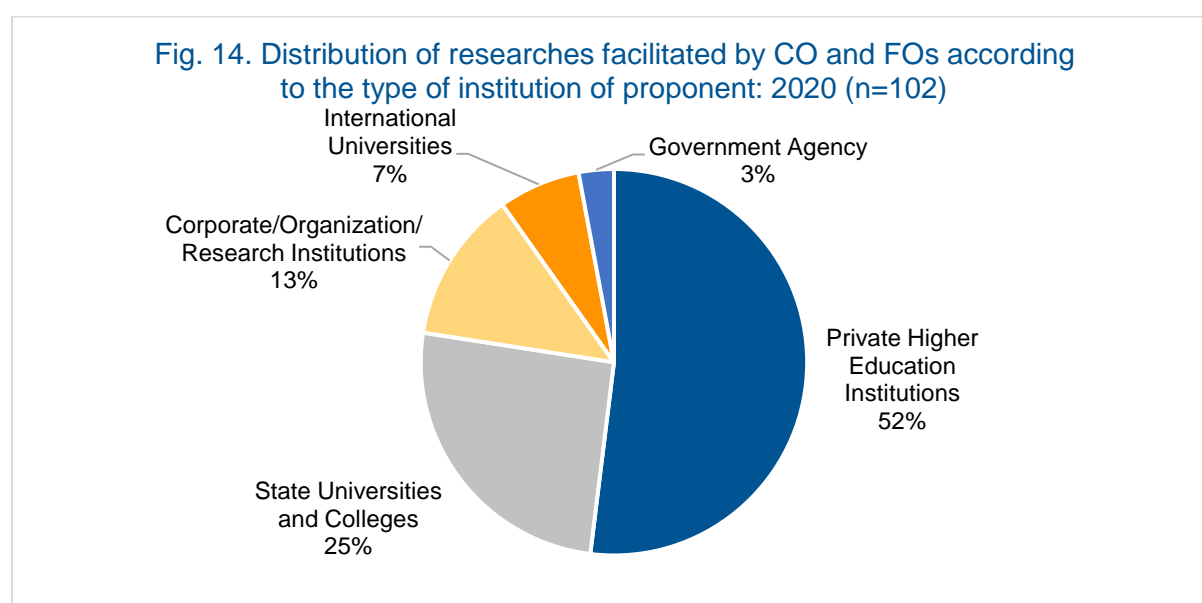

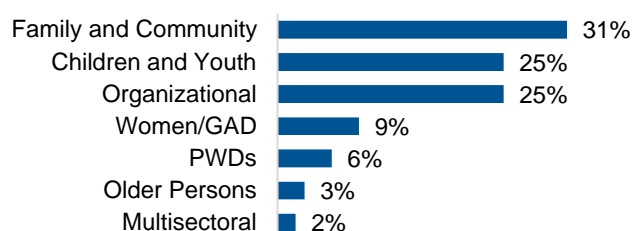

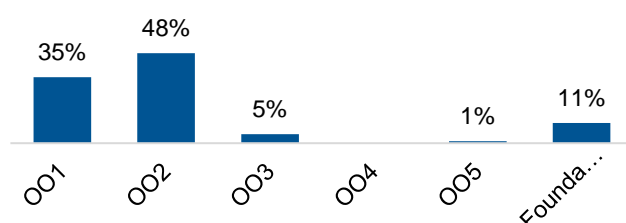

Fig. 15. Distribution of researches facilitated by CO and FOs according to Sector: 2020 (n=102)

As in the case of DSWD-initiated R&E studies, the most common sector investigated by external researchers in 2020 was family and community. Nearly one (1) in three (3) (31%) external researches facilitated in 2020 were about the family and community sector. This was followed by children and youth (25%) and organizational development (25%). External R&E studies about older persons as well as multisectoral

ones were the least facilitated, similar to the case in 2019.

Fig. 16. Distribution of researches facilitated by CO and FOs according to DSWD Organizational Outcomes: 2020 (n=102)

Nearly half (48%) of external researches facilitated by CO and FOs in 2020 were related to OO2: *Rights of the poor and vulnerable sectors promoted and protected*. This is followed by OO1: *Well-being of poor families improved* with 35% of external researches related to it. Meanwhile, little to no external researches were facilitated connected with the other OOs of the Department.

External Researches Facilitated by CO and FOs according to DSWD Organizational and Foundational Outcomes

ORGANIZATIONAL OUTCOME 1

Well-being of poor families improved

Among all the topics under DSWD OO 1, the beneficiaries of 4Ps was the most common area of study. Researches in particular would like to explore on the knowledge, attitude, and practices of the program beneficiaries, as well as their compliance to the conditionalities of the program.

Table 1. Areas of study covered in OO1

AREA OF STUDY	NUMBER OF EXTERNAL RESEARCHES
4Ps beneficiaries	13
Implementation of 4Ps	9
Effectiveness and impact of 4Ps	8
Effectiveness of SLP	2
FDS implementation	1
SLP Beneficiaries	3

ORGANIZATIONAL OUTCOME 2

Rights of the poor and vulnerable sectors promoted and protected

Under OO2, the development and improvement of centers and institutions, as well as the well-being of clients in residential facilities emerged as the most common areas of study. Most of the external studies about the former were done by Architecture students

who proposed new designs or improvements based on their assessment of the current situation of the DSWD centers and institutions. On the latter, Social Work students would like to investigate the quality of life of clients in various residential care facilities.

Table 2. Areas of study covered in OO2

AREA OF STUDY	NUMBER OF EXTERNAL RESEARCHES
Development and improvement of centers and institutions	6
Well-being of clients in residential care facilities	6
CICL	5
PWDs	5
Child abuse/exploitation	4
AICS	3
Well-being of center staff	3
Gender-based violence	2
Supplementary Feeding Program	2
Human trafficking	2
Reproductive Health	1
Community-based services	1
Adoption	1
Others	8

ORGANIZATIONAL OUTCOME 3

Immediate relief and early recovery of disaster victims/survivors ensured

Only a few external researches were facilitated under OO 3 in 2020. Resilience and adaptive capacity of households to disasters remains to be the most studied topic under this outcome.

Table 3. Areas of study covered in OO3

AREA OF STUDY	NUMBER OF EXTERNAL RESEARCHES
Resilience and adaptive capacity of households to disasters	3
Comprehensive Emergency Program for Children	1
Resource Management	1

Only three (3) external studies were facilitated in 2020 under OO5. All of which were about the social service workforce at the local government units.

ORGANIZATIONAL OUTCOME 5

Delivery of social welfare and development (SWD) programs by local government units (LGUs), through local social welfare and development offices (LSWDOs), improved

Table 4. Areas of study covered in OO5

AREA OF STUDY	NUMBER OF EXTERNAL RESEARCHES
Social Service Workforce	3

FOUNDATIONAL OUTCOMES

Stress coping mechanisms, well-being, and satisfaction of employees were the most studied topics under the DSWD Foundational Outcomes.

Table 5. Areas of study covered in the Foundational Outcomes

AREA OF STUDY	NUMBER OF EXTERNAL RESEARCHES
Human resource management and development	6
Enterprise Risk Management	1
Knowledge Management	1
Finance Management	1
Information Technology	1
Others	1

RESEARCH DISSEMINATION

One existing mechanism for the dissemination and utilization of completed R & E studies in the Department is through the DSWD-initiated social welfare and development (SWD) fora and research colloquia. With reference to MC no. 10 s. 2019, research conferences/learning fora refer to the venue for the presentation of completed researches and serve as platform for awareness and promotion of the studies.

In March 2020, the PDPB held a Research Forum aimed to disseminate the various studies on SWD and social protection (SP), and encourage stakeholders implementing SWD and SP programs to utilize the results in policy and program development.

The following DSWD-initiated research studies were presented during the forum:

[Table 6. DSWD-initiated research studies presented during the 2020 Research Forum](#)

PROPONENT OFFICE	RESEARCH TITLE	PARTNER INSTITUTION
Field Office II	Perceptions, Resilience and Adaptive Capacity of Households to Climate Extremes and Disasters in the Sixth District of Isabela	Isabela State University
Field Office II	Child Labor in the Major Industries in Cagayan Valley Region: An Assessment	Isabela State University
4Ps-NPMO	Gender Mapping Research under the Women Economic Empowerment and Leadership (WEEL) Project to Enhance Gender Outcomes of the MCCT-IP and RCCT in GIDAs	UNICEF and UP Los Baños

Also part of the program was a presentation on the key provisions of the DSWD Research and Evaluation Agenda 2019-2022 (AO No. 22, s. 2019), to further disseminate the R&E priorities of the Department to the participants.

The Research Forum was attended by a mix of representatives from relevant DSWD Offices, national government agencies, and the academe.

ISSUES/CONCERNS AND RECOMMENDED ACTIONS

ISSUES AND CONCERN	RECOMMENDED ACTION
Low turnout of researches conducted and challenges in research implementation due to the pandemic	Explore on alternative modes of data collection if primary data collection is necessary. Use of available secondary datasets may also be looked into to attain research objectives without the need to collect primary data.
The centralized database of administrative and secondary data of DSWD and compendium of statistics are not easily accessible to all stakeholders	Strengthen the dissemination of DSWD administrative and secondary data. PDPB should maximize its Content Management Team to develop an interactive database that is easily accessible in the website.
Non-compliance of external researchers on the submission of full reports of completed researches and incomplete monitoring of researches	Strengthen mechanisms for monitoring external researchers through an electronic research ticketing system with the assistance of ICTMS
Conduct of internal and external researches without undergoing review as required by the R&E Policy and Research Protocol	Continue advocating and popularizing the research-related policies of the Department (i.e., MC 9 and 10, s.2019) as mentioned in the Memorandum of Reiteration issued by the Undersecretary for Policy and Plans
Varied context in the facilitation of researches across the Central and Field Offices	Review and harmonize the processes under the Research Protocol across the Central and Field Offices in consideration of pertinent laws (i.e., Data Privacy Act, Ease of Doing Business Law, Anti-Red Tape Act, etc.)
Absence of Research Ethics Committee to review the research ethics of proposals involving human subjects	Institutionalize research ethics in the Department through the establishment of a Research Ethics Committee and operationalization of its Terms of Reference

NEXT STEPS FOR THE PDPB

1. Continue to implement the Online R&E Portal for both the CO and FOs to facilitate proper reporting and consolidation of undertaken and facilitated R&E studies
2. Strengthen the implementation and monitoring of the Client Satisfaction Measurement Survey to serve as the basis for evaluating the feedback of the researchers on the assistance to their research requests
3. Request for technical assistance from ICTMS towards the development of an electronic research ticketing system aimed to strengthen the monitoring of external researchers
4. Continue harmonizing the standard operating procedures of the research protocol across the Central and Field Offices towards ISO certification
5. Follow through on research ethics initiatives towards the establishment of a Research Ethics Committee, capacity building of its members, and operationalization of its Terms of Reference
6. Ensure the strict and continuous implementation of MC Nos. 9 (DSWD Research and Evaluation Policy) and 10 (Amendment to the Protocol for the Conduct of Research Studies in DSWD Offices, Centers and Institutions), series of 2019
7. Strengthen linkages and networking with research institutions, the academe and other stakeholders to promote awareness on the DSWD R&E Policy and amended DSWD Protocol on the conduct of research in the Department. This can be done through the cascading and popularization of the DSWD R&E Agenda and R&E Plan.
8. Continuously monitor the approved DSWD Research and Evaluation Agenda 2019-2022 (AO no. 22 s. 2019). This is to steer the Department and its partners towards results-based management and to ensure that its programs and projects remain relevant and responsive to the needs of the poor, vulnerable, and marginalized.

ANNEX A. LIST OF RESEARCH AND EVALUATION STUDIES UNDERTAKEN BY THE CENTRAL OFFICE

NO.	PROPONENT OBS	TITLE OF THE STUDY	STATUS	RESEARCH AREA	SECTOR	RESEARCH/ EVALUATION TYPE	APPROACH
1	4Ps-NPMO	Reassessing the Impact of the Pantawid Pamilyang Pilipino Program: Results of the Third Wave Impact Evaluation	Completed	OO1	Family and Community	Impact Evaluation	Fully Outsourced
2	4Ps-NPMO	Gender Mapping Research under the Women Economic Empowerment and Leadership (WEEL) Project to Enhance Gender Outcomes of the DSWD Modified Conditional Cash Transfer for Indigenous People (MCCP-IP) and Regular Conditional Cash Transfer (RCCT) Programs in Geographically Isolated and Disadvantaged Areas (GIDA)	Completed	OO2	Women/GAD	Descriptive Research	Fully Outsourced
3	4Ps-NPMO	Spot Check 2020	Ongoing	OO1	Family and Community	Descriptive Research	In-house
4	4Ps-NPMO	2019 Nationwide Survey on the Nature and Extent of Drug Abuse in the Philippines (2019 Nationwide Lifestyle Survey on Health, Risk-Behavior, and Well-being among Filipinos)	Ongoing	OO2	Family and Community	Descriptive Research	Joint
5	PDPB	Process Evaluation of the Supplementary Feeding Program	Completed	OO2	Children and Youth	Process Evaluation	In-house

NO.	PROPONENT OBS	TITLE OF THE STUDY	STATUS	RESEARCH AREA	SECTOR	RESEARCH/ EVALUATION TYPE	APPROACH
6	PDPB	Rapid Assessment of Devolved Emergency Programs and Services	Completed	OO5	Organizational	Descriptive Research	In-house
7	PDPB	Impacts of COVID-19 to Food Security and Essential Needs of the Most Affected Residents of the Areas under Community Quarantine using WFP Remote Monitoring and Assessment Tools	Ongoing	OO2	Family and Community	Longitudinal Study	Joint
8	PDPB	Cost of Raising Children with Disabilities	Ongoing	OO2	Children and Youth	Descriptive Research	Fully-outsourced
9	SLP-NPMO	Impacts of the Sustainable Livelihood Program's Microenterprise Development Assistance with Seed Capital Fund on poor households in the Philippines	Completed	OO1	Family and Community	Impact Evaluation	Fully Outsourced
